

The Main Parts of a Ship

Label the parts of a ship

1. Smokestack or funnel – acts as the chimney to remove fumes from the engine
2. Stern - is the back of the ship
3. Propeller and rudder- move and steer the ship
4. Portside is the left side of the ship
5. Starboard is the right side of the ship
6. Anchor – holds the ship in place by connecting it to the sea floor
7. Bow – is the front of the ship
8. Bridge or wheelhouse– is the control room
9. Weather Deck – is the uppermost deck exposed to the outside
