

Make your own Flying Angel

Resources needed: scissors, paper, glue, tape, markers

Paper angels are easy to make, simply cut the shape from the paper and then fold into a cone. While the template may look pretty one-dimensional, when the cone is folded the head, arms and wings of the angel will become apparent.

- Print the paper angel onto paper or thin card
- Cut around the angel as marked on the template
- Decorate the angel as required, use markers, crayons or paint. Add other embellishments to decorate
- Add a face or other details e.g write a wish on the wings
- Wrap the angel into a cone shape and use the two slits to hold the angel in shape and to form her wings (a dab of glue or small piece of adhesive tape will help to secure this)
